5x Technology Offers a New Solution to Help Improve Data Quality

5x Technology
www.5xtechnology.com

IT solutions provider 5x Technology recently launched its IntelligentInformation solution, a service that offers standardization and cleansing, merging and deduping, and data enhancement capabilities. Developed using SAP BusinessObjects Data Services software, IntelligentInformation extracts customer data out of a NetSuite system, runs it through the tool, tags records that have redundant and incorrect information, cleanses and merges duplicates, and uploads the data back into the NetSuite system.

Camelot ITLab Now Offers 3 SAP NetWeaver MDM Starter Packages

Camelot ITLab GmbH
www.camelot-itlab.com

Camelot ITLab GmbH, an IT consulting firm, offers three new starter packages, at a fixed price, to introduce customers to the functionality and advantages of SAP NetWeaver Master Data Management (SAP NetWeaver MDM). Starter package 1, a two-day intensive workshop, connects practical experience to theoretical information. Starter packages 2 and 3, “MDM Jump-Start” and “MDM Pilot,” offer preconfigured SAP NetWeaver MDM solution components on HP servers.

SAP Certifies Virtustream’s Capabilities to Deliver SAP Applications in the Cloud

Virtustream, Inc.
www.virtustream.com

Virtustream, Inc., recently announced that it is now an SAP-certified provider of cloud services. SAP has certified Virtustream’s capabilities to deploy SAP applications via the xStream cloud platform, including on-demand infrastructure, hardware, software, storage, and services. As part of the certification, the xStream platform was validated as capable of delivering the security, performance, and elasticity requirements of mission-critical applications at the high standard demanded by enterprise clients.

SEEBURGER’s 4invoice for SAP Users Adds Ready-to-Use SAP Workflows

SEEBURGER, Inc.
www.SEEBURGER.com

SEEBURGER, Inc.’s 4invoice, a purchase-to-pay solution that automates invoice processing for companies using SAP functionality for finance and materials management, now features ready-to-use SAP workflows designed to reduce deployment time. 4invoice runs entirely within the SAP environment and automates data entry and other invoice processes typically received by paper, fax, PDF, or EDI. The solution is available directly from SEEBURGER, a global provider of business integration solutions.

SmartExporter SAP Data Extraction Tool Now Available in the US

Audimation Services, Inc.
www.audimation.com

Audimation Services, Inc., a provider of data analysis technology, has announced the availability of SmartExporter, a solution designed to simplify the extraction of SAP data for review and analysis. SmartExporter can assist with transferring SAP data outside the SAP environment, particularly in areas such as security and data capacity. The solution also enables users to schedule SAP data exports for immediate download or for a specific time during off-peak business hours or weekends.

smartShift Launches Solutions for Automated SAP System Consolidation

smartShift
www.smartShiftgroup.com

smartShift, an international provider of solutions for tool-based modernization of IT systems, has recently launched its SAP consolidation solutions, which aim to benefit IT departments that need to periodically realign their SAP systems. These solutions are driven by automated processes designed to delineate custom code changes, detect and resolve conflicts in object naming and coding conventions, and find and replace hard coded literals — across all SAP instances, release levels, and locations.
